The following **estimated** costs are also common to most services and should be taken into consideration when discussing the total costs of a funeral. Because these services/products are provided by other participants, we have no control over these costs. However, we commonly pay for these expenses and in-turn charge the family their actual cost. Therefore, these costs are not marked-up, thus we do not profit from handling the payment of these expenses. We offer this service to simplify the billing process for the family.
